

Research note: Poe and the Rogers case

Documented: Poe described moving a parallel version of the Mary Rogers case to Paris and reasoning from newspaper accounts. His later explanatory note says the tale was composed at a distance and that newspapers were his investigative means. *The Mystery of Marie Rogêt* appeared serially in November and December 1842 and February 1843.

Not documented: a Rogers-case site investigation by Poe at Sybil's Cave.

Game inference: a paper that depends on Poe personally inspecting the cave is not supported merely because it contains genuine 1842 clippings.
