

CARBON LETTER - TRUSTEES

Vale Observatory / retained desk carbon / draft 2 / 16 January 1937

From: Dr. Alistair Vale, Director

Draft - not issued

To the Trustees and the Astronomical Community:

The first identification on plate V-1911-0086 was Ruth Bell's.

I published the result under my name and permitted the record to stand.

Tonight I intend to restore her credit and submit the endowment books to an independent audit. The observatory cannot ask reality to remember only those facts that preserve its founder.
